

Summer Work BTEC Unit 1- Exam Module Prep

Miss Rabjohn

MUST KNOW THIS INFO BEFORE BEGINNING THE
COURSE IN SEPTEMBER.

Summer Work

This work is for YOUR BENEFIT to help you with the exam unit AND your coursework unit in year 12.

You will be creating a fact file which means you will need to be doing A LOT of research and covering all aspects of your chosen person, so DO NOT pick someone who is not very well known.

You need access to their family history, medication they've been on, illnesses they've had, treatment, rehabs they've been to etc. ALL FACTS about them need to be documented.

Week 1 – Topic A

1. You are to create a ‘fact file’ about a favourite celebrity that you have. This fact file will be looking into the growth and development of that individual and their expected growth and development should they live through all their life stages. This will be a useful revision tool to add to and use throughout this whole topic so TAKE IT SERIOUSLY. Use the online pdf of the H&SC textbook for Unit 1.

Things to include:

- The individuals physical, intellectual, emotional and social development (PIES) across the life stages
- Timelines to show how the above development may have affected the individual both positively and negatively
- Link to assessments of that individual by developmental theorists – Piaget, Vygotsky and Skinner.

Week 2 - Topic B

1. You are to continue building your fact file regarding factors that may have affected the growth or development of your individual. You now need to add to it:
 - The individual's development in relation to nature vs nurture i.e. has anything in their environment affected their development? Parental divorce, family death, drug addiction etc.
 - Actual or potential genetic factors that have affected them
 - Actual or potential social factors that have affected them
 - Actual or potential economic factors that have affected them
 - Expected or unexpected major life events that may have occurred affecting that individual's development.

Week 3 – Topic C

1. Continuing with your fact file, you will now need to add a section about the things you said effected them last week - what impact will they have on your celebrity in the future? Should include:
 - The physical effects of ageing on your individual
 - The psychological effects of ageing on your individual
 - The social effects of ageing on the individual, including any potential health and social care provision.
 - Research where they can go and what support or treatment they would need if these effects happened.
